**Optical Specifications of Single-fiber Optical Connector**

Item		Single Mode	Multimode
Fiber Type		SM10/125 (R15, R30)	GI50/125 GI62.5/125
Applicable Optical Connectors		SC, LC, MU, FC	
Insertion Loss (against Master)	PC Polishing	0.5 dB or less	0.3 dB or less
	SPC Polishing		Not Supported
	UPC Polishing		
	APC Polishing *1		
Return Loss	PC Polishing	- *2	- *2
	SPC Polishing	40 dB or more	Not Supported
	UPC Polishing	50 dB or more	
	APC Polishing *1	60 dB or more	

\*1: SC2, LC and MU connectors do not support APC polishing.

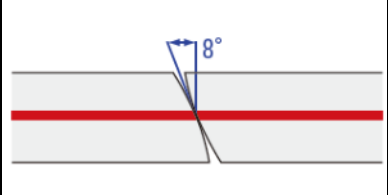

\*2: If specification of the return loss is required, please contact Fujikura Sales.

Contact us

### Methods for Polishing Optical Fiber Connectors

■ Please choose a polishing method that meets the return loss specifications of Patch Cord.

Polishing Method and End face Shape of the ferrule		Features	Return Loss (SM)
Physical Contact (PC) *3		Establishes a secure connection by aligning spherical polished end faces to ensure close contact between fibers.	-
Super PC (SPC) *4		PC polishing that helps to reduce reflection.	40dB
Ultra PC (UPC) *4		PC polishing that further reduces reflection compared to SPC.	50dB
Angled PC (APC)		Helps further reduce reflection by obliquely polishing to a spherical compared to UPC.	60dB

\*3. PC stands for Physical Contact.

\*4. For AdPC cases, please specify when placing your order.

### Availability of connections in different polished end faces

It is able to connect PC, SPC and UPC as it has spherical end face. For example, SPC end face is able to connect UPC end face. In that case, the return loss is as same as SPC-SPC connection. On the other hand, APC cannot connect to PC, SPC or UPC as it has angled end face.

The return loss is as same as SPC-SPC connection

### Simplex Patch Cords and Pigtails

SC-SC

SC-LC

LC-LC

This product is a general Simplex Patch Code used for Optical Distribution Frame. The Simplex Fiber with connector is used for wiring in the optical equipment.

#### Features

- Applicable for SC, LC, MU and FC connector
- Applicable for SM fiber and MM fiber

#### Applications

- Wiring in the optical equipment for inside plant
- Wiring in the Optical Termination Enclosure and Optical Distribution Frame

## Fiber-optic Cabling System Using 12-Fiber MPO (12MPO) Connectors for Data Centers

### Features

- High-Speed, High-Capacity Transmission**  
 Our high-performance optical fiber supports current 10GbE networks and is ready for future upgrades to 40GbE and 100GbE, ensuring long-term scalability and superior data transmission capabilities.
- Rapid Installation**  
 The Fujikura fiber-optic cabling system is designed for efficiency, featuring pre-terminated fiber-optic connectors that facilitate a plug-and-play setup. This design dramatically reduces installation time, making it ideal for data centers needing swift deployment.
- Unmatched Reliability**  
 Every Fujikura product is processed and assembled in a meticulously controlled factory environment. This ensures that our fiber-optic cabling systems offer exceptional reliability, eliminating the need for direct handling of optical fibers within your data center.
- Superior Performance**  
 Utilizing wideband multimode optical fiber, our system extends transmission distances significantly. For example, 10GBASE-SR transmissions can reach up to 300 meters with OM3 and 400 meters with OM4, providing flexibility and enhanced performance for various applications.
- High-Density Solutions**  
 Our trunk cables with 12MPO connectors minimize cabling volume, while our modular patch panels support high-density mounting. This design optimizes space and enhances the efficiency of your data center infrastructure.
- Quick Recovery**  
 In the event of cable damage, the FuseConnect™ splice-on connector enables swift and effective recovery. This feature ensures minimal downtime and maintains the operational integrity of your fiber-optic cabling system.

## Optical Patch Panel and Connector Module

### Versatile Deployment and Easy Integration

- Comprehensive Module Deployment: Suitable for various areas, including main distribution for networking.
- Diverse Range of Options: Choose from modular types to adapter panel types for optimal customization.
- Efficient and Reliable Systems: Plug-and-play connections ensure quick, easy installation and reliable performance.
- Seamless Integration: Compatible with various trunk cables and patch cords for flexible and scalable network solutions. Feel free to combine them with various trunk cables and patch cords.

## Patch Panel Chassis & Modules

FBC514P-1U

FBC514M-24LC-SM

FBC514MA-2MPO

## Features

### Versatile and High-Density Fiber Optic Solutions

- High-Density Mounting: Our modules are designed for high-density mounting in the chassis, ensuring efficient use of space and easy insertion and removal of connectors.
- Flexible Connectivity: The trunk cable features a multi-fiber MPO connector, with options to choose LC or SC connectors on the patch cord side for versatile connectivity.
- Dual Cabling Support: Each module supports both type A and type B cabling, providing flexibility and compatibility with various cabling standards.

## MPO Connector

MPO Connector

24-Fiber MPO Connector

### Features

- Advanced multi-fiber connector solutions
- MT ferrule multi-fiber connector: Utilizes an MT ferrule, with a 24-fiber type available in our lineup.
- Low-loss performance: Designed to deliver low loss even as a multi-fiber connector, ensuring reliable and efficient data transmission.

### 12-Fiber MPO (12MPO) Connector

### Trunk Cable

#### Features

- Efficient trunk cable solutions
- Data center connectivity: Trunk cables are ideal for connecting racks and rooms within data centers.
- Pre-installed connectors: Delivered with MPO and simplex connectors installed for ready-to-use convenience.
- Flexible packaging options: Available with tow-ends and reel packaging to suit various installation environments.

## Reel

### Compact and Eco-Friendly Reel Packaging

**Durable Construction:** The reel features a wooden board and paper tube body, assembled with bolts and nuts for easy disassembly and disposal on-site.

**Compact Design:** Available in flange diameters of 44 cm and 60 cm, making it easy to transport into server rooms.

**Eco-Friendly Materials:** The materials are resistant to wood waste, ensuring suitability for use within the server room environment.

## Pulling Eye

### Adaptable Pulling Eye Design

**Variable Outer Diameter:** The outer diameter of the pulling eye ranges from 30 to 50 mm, tailored to the fiber count and the number of connectors.

**Customizable Length:** The length of the pulling eye is adjustable based on the fan-out length and the quantity of connectors, ensuring a precise fit for your specific installation needs.

## Patch Cord with Fiber-optic Connector for MPO Cabling System

### Features

- Optimized patch cord solutions
- Ideal for short-distance connections: Specifically designed for short-distance connections or intra-rack use within data centers.
- Pre-terminated connectors: Supplied with MPO and single-fiber connectors, enabling quick and efficient installations.

### Simplex Connector

### Duplex Connector

#### Polarity of Duplex Connectors

Duplex connectors on both ends exhibit polarity. Please specify one of the following two polarities (X: Cross Connection, ST: Straight Connection) and include it in the model number when placing an order.

Symbol	Polarity	
	From: P1	To: P2
X	A → B	B → A
	B → A	A → B
ST	A → A	B → B
	B → B	A → A

### MPO Connector

#### Polarity of MPO Connectors

MPO connectors on both ends exhibit polarity. Please specify one of the following two polarities (X: Cross Connection, ST: Straight Connection) and include it in the model number when placing an order.

Contact us

## FAST™ Connector Series

FAST connectors are factory pre-polished, field-installable connectors that eliminate the need for hand polishing in the field. Proven mechanical splice technology ensures precise fiber alignment, a factory pre-cleaved fiber stub, and a proprietary index-matching gel, all combined to offer an immediate low-loss termination for either single-mode or multimode optical fibers.

### Features

- Easy field installation through a simplified process, without the need for electrical power, epoxy, or field polishing.
- FAST connectors are designed to accommodate 0.25 mm / 0.9 mm coated fiber, 2 mm / 3 mm cords, and rectangular-shaped outdoor/indoor cables.
- FAST connectors demonstrate high performance when combining SC/LC/ST connectors and mechanical splices.

### Structure of Mechanical Splice

Polished optical fiber is pre-affixed at the tip of the connector and stripped fiber is cleaved, aligned and meets the pre-installed fiber, where connection is done via mechanical splice method.

Contact us

### Assembly Flow of FAST Connector (0.25 / 0.9 mm Fiber Type)

1. Fiber preparation

2. Insert the cleaved fiber into the connector

3. Create a slight bend to maintain contact. Release the wedge clip by squeezing both sides and remove the wedge clip.

4. Lastly, push the boot onto the connector's body

### Specifications

#### 1. 0.25 mm / 0.9 mm Fiber, 2 mm / 3 mm Cord

Applicable Fiber / Cord	0.25 mm fiber (240-265 μm), 0.9 mm fiber (850-950 μm), 2 mm cord (Ø 2, 0.9 mm fiber inside), 3 mm cord (Ø 3, 0.9 mm fiber inside)		
Connector	SC, LC, ST		
Fiber	SM		MM (OM1, OM2, OM3) (*1)
Polishing	SPC	APC	PC
Housing Color	Blue	Green	OM1: Beige, OM2: Black, OM3: Aqua
Insertion Loss (*2)	≤ 0.5 dB	≤ 0.6 dB	≤ 0.4 dB
Return Loss (*2)	≥ 40 dB	≥ 50 dB (*3)	-

#### 2. Rectangular Shaped Cable (Outdoor / Indoor)

Applicable Fiber	Outdoor cable (3.1 x 2 mm), Indoor cable (2 x 1.6 mm) (*4)	
Connector	SC, LC (*5)

## FAST™-Plus Connector

FAST™-Plus introduces a special cleave tool, maintenance free cleaver and a new type of index matching material, called 'solid gum' which is combined with the existing index matching gel.

Due to the blade design and operation, the maintenance free cleaver produces a highly repeatable and high-quality fiber cleave condition which enables an exceptional 'first time pass' connection; meaning an OPEX reduction in customer site revisits. Due to the fact Fujikura supply the maintenance free cleaver as a pre-packaged accessory with every box of FAST™-PLUS; the CAPEX normally associated with the use of a high precision cleave tool is therefore completely negated.

In conclusion, the FAST™ PLUS product range will benefit operators in their FTTH networks builds, especially in their access network where speed, accuracy and repeatable good results matter.

## Hybrid Matching Material

FAST™-Plus connector comes with a new type of index matching material, called 'solid gum' which is combined with the existing index matching gel. This technology fills tiny gaps between the pre-installed fiber and the installing fiber. On top of that, it prevents air bubbles and contaminations from moving.

Contact us

## Maintenance-Free Cleaver

### Features

- Complementary, comes with every 100 connectors
- No cleaver investment needed, CAPEX reduction
- Easy to operate
- Every cleave is a good cleave

### Fiber End Face

Good Cleave

Bad Cleave

## FuseConnect™ Series

FuseConnect™ is designed to work with an industry standard cleaver and splicers utilising a fibre holder system and the simplified field installation process minimises the potential for operator error and expensive connector scrap, even in difficult field environments or in exposed conditions at remote site locations.

Our latest fusion splicers are also pre-programmed for FuseConnect™ terminations, which further simplifies the assembly process.

### Features

- No epoxy, no polishing
- Easily fusion splicer termination operation
- FuseConnect is designed for 900 µm coated fiber, 2 mm / 3 mm cord and rectangle shaped drop/indoor cable

### Specifications

#### 1) 0.9 mm Fiber

Applicable Fiber	0.9 mm fiber (850–950 µm)		
Connector	SC, LC, ST, FC		
Fiber	SM		MM (OM1, OM2, OM3)
Polishing	UPC	APC	PC
Housing Color	Blue	Green	OM1: Beige, OM2: Black, OM3: Aqua
Insertion Loss	≤ 0.4 dB		
Return Loss	≥ 50 dB	≥ 60 dB	-

#### 2) 2 mm / 3 mm Code

Applicable Fiber/Cable	Ø 2 mm (Inside 0.9 mm fiber), Ø 3 mm (Inside 0.9 mm fiber) or both use		
Connector	SC, LC, ST, FC		
Fiber	SM		MM (OM1, OM2, OM3)
Polishing	UPC	APC	PC
Housing Color	Blue	Green	OM1: Beige, OM2: Black, OM3: Aqua
Insertion Loss	≤ 0.4 dB		
Return Loss	≥ 50 dB	≥ 60 dB	-

#### 3) Rectangular Shaped Cable

Applicable Fiber/Cable	Outdoor (3.1 x 2 mm) or Indoor (2 x 1.6 mm)	
Connector	SC	
Fiber	SM	
Polishing	UPC	APC
Housing Color	Blue	Green
Insertion Loss	≤ 0.4 dB

## FuseConnect™ MPO

FuseConnect™ MPO splice-on, field-installable connectors are uniquely designed and feature just six components. The innovative factory pre-polished ferrule allows for a field-termination process that eliminates the need for polishing, adhesives and crimping in the field and minimizes the potential for operator error and expensive connector scrap. FuseConnect™ MPO is part of the FuseConnect™ splice-on connector family which includes SC, LC and ST style connectors.

The connector is designed for use with the new RT-02 ribbonizing tool which does not require ribbonizing glue resulting in a cleaner termination process.

FuseConnect™ MPO performs as an equivalent to the standard factory terminated MPO/MTP® assemblies. Designed to utilize standard ribbon, SpiderWeb Ribbon™, or loose tube cable, this connector helps minimize the complexity involved in the termination of a multi-fiber connection, allowing for a reliable and repeatable termination in field applications. Fujikura offers a tool kit as well as a variety of accessories designed to meet all your installation needs for your FuseConnect™ MPO application.

## Mechanical Splice

The Mechanical Splice Element enables efficient field splicing without the need for a fusion splicer.

### Features

- Two types of connections are possible:  $\varnothing$  0.25 mm /  $\varnothing$  0.25 mm fiber and  $\varnothing$  0.25 /  $\varnothing$  0.9 mm (For  $\varnothing$  0.9 mm fiber, use thermoplastic resin coating)

### Specifications

		Mechanical Splice	
		$\varnothing$ 0.25 mm fiber	$\varnothing$ 0.25 mm fiber and $\varnothing$ 0.9 mm fiber
		FMSEZ-025	FMSEZ-025/09
Size		40 x 4 x 4 (mm)	
Insertion Loss		Average 0.1 dB, Maximum 0.4 dB	
Reflection Loss		$\geq$ 40 dB	
Required tools		Fujikura's Cleaver and etc (Assembly tools is attached in product)	Assembly tools(see next page), Fiber stripper, Fujikura's Cleaver and etc
Connector Apply	$\varnothing$ 0.25 mm – $\varnothing$ 0.25 mm	Available	Available
	$\varnothing$ 0.25 mm – $\varnothing$ 0.9 mm	-	Available
	$\varnothing$ 0.9 mm – $\varnothing$ 0.9 mm	-	Available
Applicable Temperature Range		$\varnothing$ 0.25 mm fiber: -40–75 °C $\varnothing$ 0.9 mm fiber: 0–50 °C

## One-Click™ Cleaner MPO ESD

### Features

- The cleaner body is made from highly conductive resin, allowing for rapid dissipation of static electricity.
- It effectively suppresses static electricity generated on the ferrule end-face during cleaning, reducing the risk of dust attraction.
- Suitable for use in ESD (electrostatic discharge) protected area and compliant with IEC 61340-5-1<sup>(\*)</sup> standards.

The One-Click™ Cleaner MPO ESD is inaugural multi-connector (MPO) cleaning solution compliant with IEC IEC 61340-5-1<sup>(\*)</sup> standards. This cutting-edge device effectively mitigates static electricity on the connector's end face during the cleaning process, thereby preventing the movement of dust caused by static charges. It is particularly well-suited for optical transceivers sensitive to static electricity and for connections that demand exceptional low-loss performance.

### Specifications

	One-Click™ Cleaner MPO ESD
Type Name	MPOESD-CLK-A
Applicable Connector	MPO (12/24c MPO, SM/MM)
Dimension (mm) (Not included guide cap)	W19 x H43.5 x L194
Cleaning Times	≤ 500 times
Surface Resistance (Ω) <sup>(*)</sup>	< 1 x 10 <sup>12</sup>
Charge Decay (sec) <sup>(*)</sup>	< 2
Applicable Polishing Type	PC, APC

(\*1) IEC 61340-5-1: ESD management standard, ESD (Electro Static Discharge)

## One-Click™ Cleaner PRO Series

### Features

- PRO series maintaining the features of One-Click™ Cleaner:
  - Patented single-action cleaning in a small ergonomic design
  - Variety of sizes and types for different connector styles
  - Cleans connectors in both jumpers and bulkhead adapters
  - Low cost per clean
- Reduced cleaning time by eliminating the guide cap
- Increased number of cleanings by 1.5 times compared to Fujikura conventional products
- High cleaning performance by moving the cleaning string and rotating the head at the same time
- Compact/Extendable cleaning nozzle

### Applications

- Removing oil, dust, and dirt without damaging delicate fiber end-faces
- Clean connectors in tight spaces
- Field or laboratory use

One-Click™ Cleaner is an easy-to-use solution for cleaning fiber optic connectors on jumpers and in adapters. Since over 85% of network outages are attributed to dirty and/or damaged connectors, it is critical to clean every connector!

The patented One-Click™ Cleaner uses the mechanical push action to advance an optical grade cleaning tape while the cleaning tip is rotated to ensure the fiber end-face is effectively, but gently, cleaned. It is a favorite of field technicians for its ease of use, durability, effectiveness, and small size.

**One-Click™ Cleaner**

- One-Click™ Cleaner is specialized for optical connectors. It allows for the removal of oils and dust adhering to the fiber end faces.
- It prevents issues such as increased optical connector loss and damage to the ferrule end faces.

**Connector Cleaning Image**

High-quality connector connections rely on meticulous cleaning of the connector end faces.

- Even invisible dust and dirt can affect communication performance.
- Contaminants on the connector end faces may risk damaging other connectors during mating.

**SC Connector Dust Removal**

**SC Connector Oil Cleaning**

**MPO Connector Dust Removal**

**How to use**

- Both the plug and adapter can be cleaned by replacing the included guide cap. (PRO series does not require guide cap replacement)
- Applicable for PC and APC polishing type connector. (The APC type depends on connector type)

**SC Connector Cleaner**

**MPO Connector Cleaner**
